

## PRESS RELEASE

Casablanca, 22 July 2022

### **THE FINACTU GROUP IS PROUD TO HAVE SUCCESSFULLY FINALISED THE MASTER PLAN FOR THE INFORMATION SYSTEM OF THE CAISSE NATIONALE D'ASSURANCE MALADIE (CNAM) OF CÔTE D'IVOIRE.**

The Caisse Nationale d'Assurance Maladie (CNAM) of Côte d'Ivoire, created in 2014, is the Social Security Institution (IPS) responsible for managing and regulating the country's Universal Health Coverage (CMU) system. The missions assigned by the State of Côte d'Ivoire to the CNAM are of structural importance for the country's health system.

Within the framework of an international call for tenders, the CNAM has chosen the FINACTU Group to provide support for the implementation of its information system master plan (ISMP), through the following missions:

- Identify all current and future business requirements for the information system (IS) and technologies used by CNAM;
- Assessing the current situation in terms of stakeholders' needs and visions;
- define future IS directions based on best practices and needs;
- Develop the enterprise architecture vision;
- Prioritise and recommend a programme of projects.

During the reporting seminar, in the presence of the entire General Management, great expectations were formulated by the CNAM teams for this information system master plan (SDSI), which will guide the next actions of the fund for the deployment of its technical and application infrastructure in order to fully play its role for the well-being and health of Ivorians.

As Denis CHEMILLIER-GENDREAU, President of the FINACTU Group, says: **“With this mission, characterised by a particularly vast and technical scope, the FINACTU Group confirms its leadership in all aspects of African social protection, and in particular in IT issues which are absolutely crucial for the efficiency of our social protection systems: efficient IT is indeed crucial for the**

**reliability of processing, their confidentiality, their speed, and therefore for the quality of services to the insured”.**
